RE: Wireless Telecommunications Facility proposed at Hope Chapel, 7930 Mason Ave.

Dear resident:

In an effort to improve telecommunications infrastructure and provide quality service to its customers, T-Mobile is proposing to place a wireless telecommunications facility at Hope Chapel. We are working to provide a design that will blend in with the existing look of the building. The design integrates the antennas architecturally into the proposed steeple on the roof. All equipment will be screened from public view. Similar designs are being used on churches all around the City of Los Angeles.

We will be presenting the proposed design at an upcoming Winnetka Neighborhood Council meeting and request your feedback on the design.

The meeting will be April 13, 2010 and starts at 6:30PM at Valley Village 20830 Sherman Way, Winnetka. Please park inside the green gates and use the side entrance to the larger of the two buildings.

We appreciate your time and input concerning the proposed design.

Sincerely,

**Walter Gaworecki**
